

## T12 Magnetic Fluorescent Ballast Legislation Update

Starting July 1, 2010 OSRAM SYLVANIA will cease production of specific commercial rated T12 magnetic ballasts in accordance with Energy Policy ACT 2005. Under Epact 2005, OSRAM SYLVANIA will be allowed to sell through the entire current inventory of affected magnetic ballasts listed below. The projected time line for depletion of the magnetic inventory is the end of August 2010. After this date, customers can purchase electronic replacement ballast as shown in the table below.

In order to minimize delivery interruptions, it is recommended that customers use this cross reference to determine the respective electronic replacement ballasts and to update their ordering data systems. Based on sales history, the replacement chart below provides the best solution for energy efficient T12 electronic replacement ballast and as well as T8 lamp and ballast solution for lower volume 1x40-T12 commercial magnetic applications.

Mag. NAED	STATUS	Magnetic Ballast Description	Replacement NAED	Electronic Ballast Description
